A Message from our CEO

Dear Valued Customer,

As a global life science business, we are committed to ensuring the safety of our employees and the continued support of our highly important customer projects. We are actively monitoring our community, local and federal guidance, and supply chain for potential impacts due to escalation in the outbreak of the COVID-19.

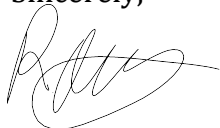

As the Coronavirus disease (COVID-19) affects more regions around the world, B2S Life Sciences continues to monitor the situation closely, establishing protocols and guidelines to minimize the impact whenever possible to our employees, our operation and our supplies. We are following guidance outlined by the WHO, CDC and governments of impacted countries, many of which have made hygiene and safety recommendations and implemented transportation/travel restrictions. Our facility has relevant and approved preparedness plans and we are empowered to act as necessary.

In order to ensure necessary attention to our clients' projects, B2S Life Sciences has provided more flexibility to workers, by moving to adaptable shifts and remote working, as necessary. This helps reduce the potential of exposure, while addressing the needs of our customers.

Customers of LCM+ can rest assured that the management, storage, continual characterization, and distribution will continue to occur per our Standard Operating Procedures.

If you have any questions at all, please don't hesitate to contact us. We are committed, as always, to full transparency and our shared success.

Sincerely,

R. Aleks Davis
Chief Executive Officer
