

B2S Life Sciences[®]

enabling excellence in biotherapeutics

IN A HISTORIC DOWNTOWN FRANKLIN, INDIANA BUILDING

B2S Life Sciences is helping clients around the world turn discoveries into drugs to treat patients. Specifically, we are a biotherapeutic enablement company advancing improved analytical methods and outcomes for companies involved in the development of biotherapeutic drugs and diagnostics.

- Biotech jobs are projected to grow 5% faster than average occupations over the next decade.
- B2S Life Sciences' average salary is 40% higher than the US median and 55% higher than that of Johnson County.
- Our employee base is comprised of more than 52% women, with more women in leadership positions than men. Four out of the top six highest salaried positions are currently filled by women.
- Presently we have 58 employees:
 - 1 M.D., Ph.D.
 - 6 Ph.D.
 - 42 B.S./M.S.
- Over 70% of our workforce has received at least one college or post-secondary degree from an Indiana university or college. We have numerous Franklin College graduates on our staff and have provided many Franklin College students with internships, as well as financial donations.
- Since purchasing our building, we have invested > \$4 million towards the infrastructure and equipment in the facility.
- In 2022 our total sales were nearly 30 times higher than the level in 2015.
- Approximately 11% of our current project work is from outside of the United States
- A large majority of our employees reside in Johnson County, with many living in Franklin.
- Our estimated annual 2022 employee income tax liability is \$150,000 for the state and \$22,500 for the local municipalities.
- Since inception, our company has donated and sponsored community events amounting to more than \$40,000. Most of these events are in or near Franklin, Indiana. We are involved in community and local college organizations.
- We are presently evaluating strategies for expanding our physical space and operations to accommodate the rapid growth in our company.
